

Closed Cell Foam Insulation & PVC Wrap

Nevron Insulation has developed a cost effective system for insulating and protecting pipe work that is both quick to install and gives a durable, long lasting finish.

Utilising commercially available pre-formed closed cell insulation and our specifically manufactured PVC wrap, Nevron are able to insulate rigid, semi-rigid and flexible pipes with this single system.

Originally designed for insulating trace heated pipe work the system is equally adept for applications that just require insulation.

Foam & Wrap is ideal for use on dosing lines as the system is quick to install and easily removed & replaced for any maintenance issues that may arise.

The PVC wrap has full length closures as standard using a hook & loop overlap seal ensuring a good fit.

PVC wrap provides a durable UV stable finish that helps to prevent the ingress of the prevailing environmental conditions, & foreign bodies.

Bends, Elbows and Tees are pre-manufactured by Nevron and are fitted in the same manner as the straight lengths. The PVC wrap is available in a selection of colours and can be easily directionally marked.

Trace Heated ABS Sample Line

- **Closed Cell Foam Insulation & PVC Wrap**
- **Tough, UV Stable, Durable Finish**
- **Easy Removal/Replacement For Maintenance**
- **Ideal For Rigid, Semi-rigid & Flexible Pipes**
- **Suitable over Trace Heating & Bare Pipes**
- **Fastening & Closure Ensures Good Fit**
- **Easily Marked For Direction/Identification**
- **Selection Of Colours Available**

Installed on a Sludge Line

Traditionally installed foam insulation is often unprotected and prone to damage. Poorly installed section does not provide the vital insulation properties leading to unnecessary maintenance requirements, which in turn results in further damage and cost. All of these potential problems are resolved by the Nevron Foam & Wrap system, professionally installed to provide a cost effective, durable and reliable system.

Nevron's Foam & Wrap system is part of a portfolio of solutions for the Water Utility Market. Nevron Insulation offer a full reliable, design, manufacture & installation package for trace heating and insulation tailored to the needs of waste water, sewerage and clean water sites.

Nevron Insulation is a leading provider of insulation and process heating systems. Our highly experienced team hold nationally accepted qualifications and accreditation for all forms of insulation and heating services, working throughout the industrial sector in the water utility, confectionery, petrochemical, paper, construction and pharmaceutical sectors. Nevron provides a fast, reliable and professional design, manufacturing and nationwide installation service. Details of all our services and national contacts can be found on our web site.
